

mobivive

the Menu

Recharge your energy, unleash your sparkle, and reveal your best self with Mobivive. We offer medically-proven intravenous therapy.

Our purpose at Mobivive lies in giving... To give happiness. To give energy. To give health. To give hope. To give those who are suffering from stress their life back.

We live in a fast-paced world that leads to long working hours, unhealthy eating habits and a lack of movement. The result of this is numerous health conditions, being susceptible to viruses, decreased immunity, bacterial and viral infection, mental fatigue and not being the best person you can be.

This is the reason we developed Mobivive, to bring you all the required medically-proven solutions in the most effective manner.

STUDENT IV THERAPY*

the Student Drip

Calling on all Students - This is the perfect combination of vitamins to improve mental focus and boost energy levels while detoxing the body to get the most out of your studies. Not only will you be better mentally prepared, but you will also be fully rehydrated and ready for the next big night out.

Calcium Gluconate

Regulating blood sugar levels to boost athletic performance and crucial for brain and body.

Magnesium Sulphate

Known as the master mineral magnesium is responsible for more than 300 metabolic processes in the body from easing anxiety and depression and boosting athletic performance.

Vitamin C

this vitamin is one of the biggest immune boosters as it helps strengthen your body's natural defense. Maintaining healthy levels of vitamin C can reduce the chance of stress related diseases.

Thiamine

This vitamin helps to convert glucose into energy and is essential for the normal function of nerve cells. Otherwise known as the "anti-stress vitamin", thiamine boosts the immune and soothes the nervous system, helping prevent stress related breakouts.

Vitamin B Complex

Boost brain power in various ways. Prevent fatigue, which is a major cause of procrastination during students.

OBGYN IV THERAPY

the Prego Hydration

With IV therapy during pregnancy, you'll be provided with hydration, vitamins, and nutrients that support a healthy pregnancy. IV therapy is safe, quick, and effective. In a short time, you will receive the nutrients your body needs to continue growing a little human and reverse the effects of dehydration. This will mitigate morning sickness, minimizes nausea, increase energy, reduce swelling, keep your body temperature cooler and soften your skin. It also decreases constipation, urinary tract infections and the risk of preterm labor and preterm birth.

Vitamin C	Important for a healthy immune system, and during pregnancy it helps you and your baby make collagen for your tendons, bones, and skin.
Pyridoxine (Vitamin B6)	During your pregnancy, vitamin B6 is vital for your baby's developing brain and nervous system. It also helps your baby metabolize protein and carbohydrates.
Folic Acid (Vitamin B9)	Helps make DNA and other genetic material. The nutrient is crucial during early pregnancy to reduce the risk of birth defects of the brain and spine.
Cobalamin (Vitamin B12)	This vitamin is one of the best for energy, help form red blood cells and help to prevent spina bifida and other spinal and central nervous system birth defects in your baby

- R 750

WEIGHT LOSS IV THERAPY

the Baywatch

Our IV treatment for weight loss is designed to help you burn fat. However, this treatment is ideal to be combined with a healthy diet and regular exercise. This blend of vitamins and minerals will help accelerate your metabolism, break down body fat naturally and help burn calories faster. In fact, staying hydrated is important to help your body use energy and burn fat to the best of its ability.

Arginine | This antioxidant converts your body fat reserves into energy and helps muscle mass formation and development by increasing your resting metabolic rate, allowing to burn more calories.

Carnitine | This will help move more fatty acids into your cells to be burned for energy.

Glutamine | This will promote weight loss by altering the composition of the gut microbiome, decrease inflammation and improve insulin sensitivity.

Lipostat Plus (MIC) | Lipostat is composed of a combination of lipotropic nutrients known as Methionine, Inositol & Choline, designed to aid in fat loss. When these vitamins and amino acids are introduced to the body, fat and bile in the liver are broken down. It aids in breaking down fat, removing heavy metals from the body, and helps with digestion. It is one of the important amino acids that increase energy, creates lean muscle mass, and increases liver enzymes.

Vitamin B Complex | This vitamin assists your body in making new red blood cells, which carry oxygen through your body to keep your immune system strong.

COVID-19 IV THERAPY

the Covid Block

Your body will not be equipped to fight off the virus with a poor immune system. Our COVID Block IV hydration treatment provides all the required and proven ingredients to assist your immune system in fighting off and protecting your body from the Covid-19 virus.

Proper hydration is necessary in maintaining a strong immune system and staying healthy. It will oxygenate the blood, flush out toxins, help with lymph production, and moisten your eyes and mouth.

Taking only 30 minutes, our COVID Block IV hydration treatment provides your body with the following four essential nutrients directly into your bloodstream for maximum absorption:

Vitamin C

This vitamin is one of the biggest immune boosters as it helps strengthen your body's natural defences.

Zinc

This is an essential mineral with a wide range of roles in the body, which includes supporting the function of over 300 enzymes. Your body needs zinc to ensure the normal functioning of your metabolism, as well as the reproductive, cardiovascular, and nervous system.

Selenium

This antioxidant helps lower oxidative stress in your body, which reduces inflammation and enhances immunity.

Vitamin B12

This vitamin plays a crucial role in the proper functioning of the immune system, as it helps keep the body's nerve and blood cells healthy.

Thiamine (Vitamin B1)

This vitamin converts carbohydrates and fats into glucose. Glucose provides the energy your body needs for optimal health.

Riboflavin (Vitamin B2)

Boost the activity of certain immune cells, plays a vital role in maintaining the body's energy supply and helps break down fats and medication.

Nicotinamide (Vitamin B3)

Also known as Niacin, this vitamin will increase your blood flow to deliver vital nutrients faster and stimulate red blood cell production for better oxygen.

d-Panthenol (Vitamin B5)

This vitamin helps produce energy by breaking down fats and carbohydrates. It also promotes healthy skin, hair, eyes and liver.

Pyridoxine (Vitamin B6)

This vitamin enables the protein you ingest to repair tissue, which helps keep the skin, nervous system, and brain healthy, and facilitates the formation of antibodies that help fight infection.

Magnesium Sulphate

Known as "The Master Mineral" magnesium is responsible for more than 300 metabolic processes in the body from easing muscle cramps, reducing risk of diabetes, ease anxiety and depression and boosting athletic performance.

Calcium Gluconate

From regulating blood sugar levels to boosting athletic performance, calcium is crucial for your brain and body.

- R 1100

SKIN LIGHTENING THERAPY

the Light Switch

If you are looking to lighten your skin tone, then you have come to the right place. Mobivive offers a double dosage of Glutathione and Vitamin C to lighten your skin tone in the most effective way possible. It is recommended to receive 6 - 10 treatments over a 10-week cycle for the best possible results.

Your Skin color is determined by the production of melanin, which is produced by melanocytes in the bottom layer of the epidermis. Increased melanin in the body will result in a darker skin tone. Glutathione inhibits the melanin production therefore reduces the concentration of pigmentation. As a result, it lightens and evens the skin tone.

Glutathione

This antioxidant is administered via IV and is able to deposit evenly throughout the body. Glutathione will swop up the oxidative damaged cells (which cause skin to darken) and lighten your skin naturally, safely, evenly and in a healthy manner.

Vitamin C

Has unique anti-spot property to lighten dark spots without altering your normal skin's pigmentation. Vitamin C also aids in the whitening process by priming the skin cells and making them more susceptible to the effects of Glutathione.

HANGOVER TREATMENT

the Babelas Beater

Whether you perhaps drank too much or mixed your alcohol, whatever the reason, a hangover starts when the level of alcohol in the blood starts to drop. Alcohol affects almost every part of your body by making it dehydrated, it also slows the release of hormones, and causes excessive sweating as your heart works overtime to narrow the blood vessels. The gastro-intestinal tract gets seriously irritated, resulting in your stomach lining and intestines becoming inflamed, and the release of intestinal acids, which leads to more pain and vomiting. Alcohol makes it difficult for the liver to metabolise sugar, leading to weakness and fatigue.

Our Babelas Beater IV treatment quickly regenerates fluids and replaces electrolytes and other nutrients in your body to get you hydrated in an instant and quench your body's thirst. This IV infusion contains high levels of antioxidants to help your body remove the toxins produced by alcohol, it also supplies your body with the necessary salts known as calcium, potassium and magnesium that help maintain the flow of essential fluids throughout your body's cells.

The Babelas Beater contains the following four main ingredients to reduce inflammation, remove toxins, hydrate your body, and provide energy:

Vitamin B Complex

Your body uses vitamin B to process alcohol, which leaves you deficient in the essential nutrient the next morning and in need of replenishment.

Vitamin C

This vitamin will help your body to recover from the ingested toxins as it assists the liver to speed up the breakdown of alcohol.

Cobalamin (Vitamin B12)

This vitamin performs a key role in the functioning of the brain and nervous system to keep you mentally sharp once the alcohol levels in your bloodstream start to drop.

Thiamine (Vitamin B1)

This vitamin acts as an antioxidant to protect your body from the degenerative effects of aging, smoking and alcohol consumption.

Glutathione

This antioxidant helps detoxify as well as eliminate poisons, fat soluble toxins, and heavy metals in the liver, lungs, intestines and kidney.

IMMUNE BOOST IV THERAPY

the Kick-Start

The build-up of toxins in your body weakens your immune system, making you more susceptible to viruses and diseases. Guard yourself against viral, bacterial, and parasitic infections with an IV drip that will enhance your immune system.

Our Kick-Start IV treatment is formulated with four powerful proven ingredients to assist your immune system in protecting your body from colds, flu and other viral threats. The Kick-Start IV improves your health by delivering nutrients directly to your bloodstream for maximum absorption.

With a busy lifestyle, you don't need to dramatically alter your schedule to bring effective immune system boosters into your life. Our Kickstart IV is the solution.

The Kick-Start IV treatment consists of the following ingredients:

IV Fluids	This will help hydrate your body to maintain a strong immune system and keep you healthy. Being hydrated provides many benefits for your immunity, like keeping your mouth and eyes moist to fight off infections.
Vitamin B Complex	This vitamin assists your body in making new red blood cells, which carry oxygen through your body to keep your immune system strong.
Vitamin B12	This vitamin plays a crucial role in the proper functioning of the immune system, as it helps keep the body's nerve and blood cells healthy.
Vitamin C	This vitamin is one of the biggest immune boosters as it helps strengthen your body's natural defences.
L-Carnitine Plus	This boosts your metabolism by improving mitochondrial function and increasing cellular energy. Many athletes use it to help burn fat, enjoy enhanced recovery, and prevent muscle fatigue.
Glutathione	The master detoxifier and the body's main antioxidant, Glutathione protects your cells and makes your metabolism run optimally.

- R 1150

ANTI-AGING IV THERAPY

the Anti-Clockwise

If you feel that your skin is short on the nutrients to protect you against UV damage, or want to improve dryness and remove toxins within the skin, turn back the clock with this IV infusion. It's packed with all the powerful vitamins and benefits to boost anti-aging, as well as help you look and feel more vibrant. The Anti-Clockwise IV treatment consists of the following ingredients:

Glutathione	An antioxidant that protects your skin from free radicals that causes damage to your skin. This helps bring back even pigmentation and a youthful glow to your skin.
Vitamin C	A powerful antioxidant that's essential for collagen formation, healing wounds, and growing new tissue. Vitamin C has been shown to improve skin texture and tone.
Vitamin B12	This offers significant anti-aging benefits to improve your appearance and memory, as well as boost your mood and energy levels.
Selenium	A mineral that is known to help prevent skin cancers caused by UV damage as it reduces the effect of the sun's rays on the skin. Selenium also slows the skin aging process by preserving elasticity.
Zinc	This mineral is found in the top layer of your skin and assists the antioxidants by preventing new free radicals from damaging the skin, essentially preventing the formation of wrinkles at molecular level. Zinc strengthens the cell membrane and allows new, youthful cells to reach the surface.
L-Carnitine	This enhances the ability of the cell to hold onto the moisture produced in the skin, and ensures that the skin is able to retain the moisture content.
Riboflavin (Vitamin B2)	This vitamin helps to improve skin tone, make skin more radiant, and balance natural oils, which is great for dry skin or acne.
Pyridoxine (Vitamin B6)	This vitamin helps regulate the body when producing serotonin (the happy hormone), melatonin (the sleep hormone), and norepinephrine (a stress hormone), as well as increases cell regeneration and removes dryness, which are linked to breakouts and premature aging.
d-Panthenol (Vitamin B5)	This vitamin preserves the moisture in the skin, which improves skin elasticity and contributes to a fuller, more hydrated looking face. As hydrated skin is more resilient, B5 can help reduce the signs of aging.
Thiamine (Vitamin B1)	This vitamin helps to convert glucose into energy, aids in wound healing, and is essential for the normal function of nerve cells. Otherwise known as the "anti-stress vitamin", B1 boosts the immune system and soothes the nervous system, helping prevent stress-related breakouts.
Biotin	This supplement can correct the tissue; improve skin and help to create a youthful glow
Folic Acid (Vitamin B9)	This vitamin has the ability to slow the progress of age related memory and cognitive decline, while fighting premature aging, specifically wrinkles and fine lines.

DETOXIFY IV THERAPY

the Detox Guru

Feeling run down, fatigued, exhausted, having trouble remembering things, concentrating, or experiencing a slump in our weight loss journey despite your best efforts? Your body could be overrun with toxins.

There are a variety of harmful toxins that can keep us sick, tired, depressed and overweight. When too many of these enter your body at one time, the liver stores them for excretion later. But since we are constantly bombarded by these toxic substances, our liver never gets the chance to remove it and it then remains in your body leading to long-term health complications.

Ensuring your liver is functioning optimally is crucial for good health. Our Detox Guru IV is a comprehensive solution, perfectly designed to detoxify your body with all the antioxidants and vitamins your body, and especially your liver, seeks. The antioxidants inside the treatment attach themselves to the toxins to help neutralise them until they are eliminated.

In addition to improving liver function and boosting your overall immune system, you may also experience increased energy and focus because of the higher acetylcholine (a neurotransmitter) levels, when you undergo this treatment.

The Detox Guru IV treatment consists of the following ingredients:

Vitamin C | High levels of vitamin C help rid your body from toxins, leaving you feeling refreshed and energised.

Vitamin B Complex | This vitamin has cleansing properties to remove the toxins quickly, and helps bring your body back to a normal, more regular state.

Thiamine
(Vitamin B1) | This vitamin converts carbohydrates and fats into glucose. Glucose provides the energy your body needs for optimal health.

Vitamin B12 | This vitamin keeps your body's nerve and blood cells healthy. It also helps prevent a type of anemia, called megaloblastic anemia, that causes people to feel tired and weak.

Glutathione | This antioxidant helps detoxify as well as eliminate poisons, fat soluble toxins, and heavy metals in the liver, lungs, intestines and kidney.

Alpha Lipoic Acid | This helps detoxify the liver, assist other antioxidants during detoxification, and slow down the aging process.

ENERGY BOOSTER IV THERAPY

the **Beast**

If you suffer from fibromyalgia, low energy levels or fatigue, this IV treatment will be highly beneficial for your health and vitality. The Beast IV infusion has eight nutrients and minerals that will give you a long-lasting boost of energy so that you don't have to miss out on the activities you need to or want to do.

Say goodbye to caffeine and high-sugar energy drinks, with the inevitable crash, as this therapy will deliver the vitamins and minerals you need directly to your bloodstream, allowing your body to quickly absorb the essential nutrients for fast and long-lasting results.

The Beast IV treatment consists of the following ingredients:

Glutathione	The master detoxifier and the body's main antioxidant, Glutathione protects your cells and makes your metabolism run optimally.
Riboflavin (Vitamin B2)	This vitamin plays a vital role in maintaining your body's energy supply by helping to convert carbohydrates into adenosine triphosphate (ATP).
Nicotinamide (Vitamin B3)	Also known as niacin, this vitamin plays a vital role in converting food into usable energy and helps your body's cells carry out important chemical reactions.
Pyridoxine (Vitamin B6)	This vitamin is needed to make red blood cells that transport oxygen throughout your body, helping you feel energised.
d-Panthenol (Vitamin B5)	This vitamin helps produce energy by breaking down fats and carbohydrates. It also promotes healthy skin, hair, eyes and liver.
Vitamin B12	This vitamin is one of the best for energy, as almost every cell in the body uses B12. It helps form red blood cells, as well as converts fat and protein into energy. A B12 deficiency causes tiredness and anemia.
Thiamine (Vitamin B1)	This vitamin converts carbohydrates and fats into glucose. Glucose provides the energy your body needs for optimal health.
Vitamin C	High levels of vitamin C help rid your body from toxins, leaving you feeling refreshed and energised.
Magnesium Sulphate	Known as "The Master Mineral" magnesium is responsible for more than 300 metabolic processes in the body from easing muscle cramps, reducing risk of diabetes, ease anxiety and depression and boosting athletic performance.
Calcium Gluconate	From regulating blood sugar levels to boosting athletic performance, calcium is crucial for your brain and body.

- R 1 450

HIGH PERFORMANCE & ENDURANCE THERAPY

the V8

Both nutrition and proper hydration play a vital role in athletic performance. If you're in need of a boost, our V8 IV therapy is loaded with amino acids and essential nutrients to give your body the fuel it needs to support the muscular and cardiovascular system.

This comprehensive infusion will help build and maintain muscle, combat fatigue and overtraining, regulate blood sugar levels, fight the build-up of lactic acids, increase metabolic rate, alleviate muscle soreness, help prevent cramps, boost energy production, reduce inflammation, replenish nutrients that have been lost in sweat, as well as provide electrolytes which will help keep your body hydrated, and your muscles and nerves functioning at an optimal level.

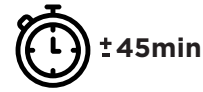

Vitamin C	To help with sore muscles, this vitamin will assist and speed up the healing process of the cells by repairing the tiny tears within the muscle.
Glutathione	This antioxidant is critical to maintain ATP (adenosine triphosphate), which is the source of energy that keeps your muscles and body functioning. With higher levels of Glutathione, your body will produce more ATP, improving your endurance.
Vitamin B12	This vitamin helps form red blood cells and converts food into energy. It ensures that the brain and muscles communicate efficiently, which affects muscle growth and coordination.
Thiamine (Vitamin B1)	This vitamin is required by your body to produce energy and repair tissue, which are both necessary for your body's recovery after exercise.
Riboflavin (Vitamin B2)	This vitamin is vital for muscle recovery, converting carbohydrates into usable energy (ATP), and helping your muscles store the energy.
Nicotinamide (Vitamin B3)	Also known as Niacin, this vitamin will increase your blood flow to deliver vital nutrients faster and stimulate red blood cell production for better oxygen.
d-Panthenol (Vitamin B5)	This vitamin helps turn the food you eat into the energy you need. It's important for many functions of the body, especially making and breaking down fats.
Pyridoxine (Vitamin B6)	This vitamin enables the protein you ingest to repair tissue, which helps keep the skin, nervous system, and brain healthy, and facilitates the formation of antibodies that help fight infection.
L-Carnitine Plus	This boosts your metabolism by improving mitochondrial function and increasing cellular energy. Many athletes use it to help burn fat, enjoy enhanced recovery, and prevent muscle fatigue.
Glutamine	Glutamine is the most abundant amino acid in our bodies. It support our health functions by making protein for muscle tissue, fueling cells to protect our intestines, reduces recovery time and support in burning fat.
Magnesium Sulphate	Known as "The Master Mineral" magnesium is responsible for more than 300 metabolic processes in the body from easing muscle cramps, reducing risk of diabetes, ease anxiety and depression and boosting athletic performance.
Calcium Gluconate	From regulating blood sugar levels to boosting athletic performance, calcium is crucial for your brain and body.
Recommended "additional vitamins"	Extra 100mg (1ml) Arginine

SIGNATURE IV THERAPY

the Royal IV

If you are looking for the most comprehensive IV Drip available in South Africa than you have come to the right place. This Vitamin Drip has the famous Mobivive signature on it and is compounded with all the available vitamins, antioxidants, minerals, trace elements, nutrients and amino acids that can be offered through an Intravenous drip.

This will provide your body with a double dosage of antioxidants together with 15 different Vitamins, delivered directly to your bloodstream in two separate IV's to boost every possible vitamin deficiency that you might have. It will cover detoxification, immune boost, anti-aging, energy boost, muscle recovery, fat burn, skin glow, stress relive and memory improvement.

Vitamin C	Is one of the biggest immune boosters as it helps strengthen your body's natural defences include the formation of skin, tendons, ligaments, and blood vessels for healing wounds and forming scar tissue.
Glutathione	The master detoxifier and the body's main antioxidant, Glutathione protects your cells and makes your metabolism run optimally and contribute to a youthful and glowing skin.
Vitamin B12	This vitamin is one of the best for energy, almost every cell in the body uses B12. It helps form red blood cells, as well as converts fat and protein into energy.
Thiamine (Vitamin B1)	This vitamin helps to convert glucose into energy, aids in wound healing, and is essential for the normal function of nerve cells. Otherwise known as the "anti-stress vitamin", B1 boosts the immune system and soothes the nervous system, helping prevent stress-related breakouts.
Riboflavin (Vitamin B2)	This vitamin is vital for muscle recovery, converting carbohydrates into usable energy (ATP), and helping your muscles store the energy.
Nicotinamide (Vitamin B3)	Also known as Niacin, this vitamin will increase your blood flow to deliver vital nutrients faster and stimulate red blood cell production for better oxygen.
d-Panthenol (Vitamin B5)	This vitamin preserves the moisture in the skin, which improves skin elasticity and contributes to a fuller, more hydrated looking face. As hydrated skin is more resilient, B5 can help reduce the signs of aging.
Pyridoxine (Vitamin B6)	This vitamin helps regulate the body when producing serotonin (the happy hormone), melatonin (the sleep hormone), and norepinephrine (a stress hormone), as well as increases cell regeneration and removes dryness, which are linked to breakouts and premature aging.
Biotin (Vitamin H)	Boosts the health of your skin, hair, eyes, liver, and nervous system.
Folic Acid (Vitamin B9)	Helps your body produce and maintain new cells, and also helps prevent changes to DNA that may lead to cancer.
L-Carnitine Plus	This boosts your metabolism by improving mitochondrial function and increasing cellular energy. Many athletes use it to help burn fat, enjoy enhanced recovery, and prevent muscle fatigue.
Selenium	This antioxidant helps lower oxidative stress in your body, which reduces inflammation and enhances immunity.
Zinc	This mineral is found in the top layer of your skin and assists the antioxidants by preventing new free radicals from damaging the skin, essentially preventing the formation of wrinkles at molecular level. Zinc strengthens the cell membrane and allows new, youthful cells to reach the surface.
Alpha Lipoic Acid	This helps detoxify the liver, assist other antioxidants during detoxification, slows down the aging process and increase the production of acetylcholine, a brain chemical that is a key component of memory.
Glutamine	Glutamine is the most abundant amino acid in our bodies. It support our health functions by making protein for muscle tissue, fueling cells to protect our intestines, reduces recovery time and support in burning fat.
Magnesium Sulphate	Known as "The Master Mineral" magnesium is responsible for more than 300 metabolic processes in the body from easing muscle cramps, reducing risk of diabetes, ease anxiety and depression and boosting athletic performance.
Calcium Gluconate	From regulating blood sugar levels to boosting athletic performance, calcium is crucial for your brain and body.
Arginine	Helps to lower blood pressure and has cardiovascular benefits. It supports athletic performance by converting this aminoacid into the chemical Nitric Oxide.
Recommended "additional vitamins"	Extra 125mg NAD+ (1ml) Extra 3ml Lipostat Plus

NAD+ IV THERAPY

the MobiNAD+

NAD+ will fuel your body, boost your energy and cognitive function, improve your mood, and reverse the symptoms of aging. Whether you're a professional athlete looking to improve your performance naturally or a student seeking to improve your memory, NAD+ IV therapy may be able to help. This innovative treatment has gained popularity among celebrities, athletes, and everyday people because it offers an assortment of benefits.

Essentially, NAD IV treatment provides the body with ample fuel on the cellular level, by increasing levels of ATP (adenosine triphosphate). With higher levels of NAD and ATP, the body can carry out a wide range of functions including an improved ability to regulate metabolism, resist stressors, repair DNA, endocrine signaling and cell apoptosis.

Delivering NAD+ through an IV allows more of the coenzyme to be absorbed by the body. NAD+ IV therapy circumvents the digestive system ensuring the NAD+ coenzyme doesn't get broken down before it reaches the cells that need it most. Major benefits of NAD+ is to aid in addiction recovery, reduce pain, improve cognitive function, boost energy, improve athletic performance, help with weight management, reverse signs of aging and delay or prevent the onset of certain diseases.

MobiNAD+ uniquely designed 5-7 day NAD+ IV Therapy programs:

1		Single NAD+ IV therapy session	- R 1 250
2		Reverse Aging Program	- R 8 500
3		Addiction Recovery Program	- R 8 500
4		Athletic Endurance & Performance Program	- R 8 900
5		Neurological Disorder Recovery	- R 10 300
