GHK-CU (COPPER PEPTIDE) INFORMATION DOCUMENT

WHAT IS GHK-CU, ANYWAY?

GHK-Cu (Glycyl-L-Histidyl-L-Lysine-Copper) is a naturally occurring tripeptide complexed with copper ions, originally found in human plasma, saliva, and urine, with levels that decline significantly after age 60. This powerful "youth signal" peptide has been extensively researched for its remarkable ability to "reprogram" aging cells, stimulate tissue repair, and reverse visible signs of aging. Delivered via convenient prefilled cartridge pens in 2mg daily doses administered subcutaneously, each cartridge provides 60mg total (30 doses) for a full month of therapy.

INTRODUCING GHK-CU AT mobivive

Turn back the clock at the cellular level with GHK-Cu—the scientifically-proven copper peptide for skin rejuvenation, hair restoration, and comprehensive anti-aging! mobivive pairs GHK-Cu therapy with targeted Skin Glow and Detox IVs to amplify your results and help you achieve radiant, youthful vitality from the inside out.

THE SCIENCE

GHK-Cu works through multiple powerful mechanisms that target the root causes of aging: it attracts immune and endothelial cells to injury sites for enhanced healing, stimulates fibroblasts to produce collagen and elastin, increases VEGF for improved blood flow and nutrient delivery to skin and hair, provides copper-dependent antioxidant enzyme activation (SOD) to protect against oxidative damage, and remodels the extracellular matrix for improved tissue architecture.

THE GHK-CU PROCESS AT mobivive

1. **Complete your medical questionnaire**

Fill in the questionnaire. If you answer **"No" to all questions**, your **GHK-Cu order is placed**.

If you answer **"Yes" to any question**, a **once-off consultation (R500)** is required.

2. **Order and delivery**

Your GHK-Cu arrives as a **prefilled cartridge pen**, no vials, no mixing.

3. **Daily injection routine**

Self-administer once daily: remove cap, dial your prescribed dose (2mg), clean injection site, and inject subcutaneously at a 45-90° angle. For facial/neck skin improvement, inject into lower abdomen or thighs (systemic

Address: Shop 5A, 1st Floor, The Promenade, 87 Victoria Road, Camps Bay 8005

benefits). For scalp/hair restoration, some clients inject subcutaneously into the scalp area under guidance. Rotate sites daily.

KEY REMINDERS

- Inject once daily, ideally in the evening (PM application popular for overnight repair)
- Can be administered with or without food
- Rotate sites daily between abdomen, thighs, upper arms, or scalp as appropriate
- **Essential: Use broad-spectrum SPF 30+ sunscreen daily**
- Store prefilled cartridge pen in refrigerator
- Most clients notice improved skin texture within 2-4 weeks
- **All mobivive peptides are prefilled cartridge pens, no vials, no needles**

HOW MUCH DOES IT COST

GHK-Cu Prefilled Cartridge Pen: R1,350

(30-dose supply (one month) + medical questionnaire review; R500 consultation fee applies if questionnaire triggers doctor review)

THE GHK-CU RADIANCE & REJUVENATION PROGRAM

This comprehensive 12-week program pairs your daily GHK-Cu therapy with 12 weekly Skin Glow IV treatments (glutathione, vitamin C, B-complex, minerals, antioxidants) to create powerful anti-aging synergy from inside and out.

LET'S TALK SIDE EFFECTS

GHK-Cu is generally well-tolerated with a good safety profile when used appropriately. Some clients may experience mild injection site tingling or slight stinging sensation (copper effect—usually brief), temporary redness at injection site that fades within hours, or transient increased skin sensitivity (rare).

BOOKING YOUR TREATMENT / ORDER YOUR PEPTIDE

Ready to unlock cellular rejuvenation? Whether you need more info or are ready to **order your peptide**:
