CJC-1295/IPAMORELIN COMBINATION INFORMATION DOCUMENT

WHAT IS CJC-1295/IPAMORELIN, ANYWAY?

CJC-1295/Ipamorelin is a synergistic combination of two powerful growth hormone optimization peptides delivered together in a convenient prefilled cartridge pen for maximum effectiveness. CJC-1295 is a long-acting growth hormone-releasing hormone (GHRH) analog that extends the half-life of natural GH pulses, while Ipamorelin is a selective ghrelin mimetic that triggers clean GH release without elevating cortisol or prolactin. Together, they create sustained, physiological growth hormone elevation (2-10x baseline) when administered subcutaneously once daily, Monday to Friday (100mcg of each peptide), before bedtime. Each cartridge provides 2mg total (20 doses) for four weeks of weekday therapy.

INTRODUCING CJC-1295/IPAMORELIN AT mobivive

Experience the gold standard of natural growth hormone optimization with the CJC-1295/Ipamorelin combination your comprehensive solution for recovery, body composition, anti-aging, and performance! mobivive pairs this powerful therapy with targeted Wellness and Recovery IVs to maximize your regenerative potential.

THE SCIENCE

CJC-1295 and Ipamorelin work through complementary pathways to create sustained, healthy GH elevation: CJC-1295 extends the half-life of endogenous growth hormone pulses by binding to albumin, providing longer-lasting GH availability, while Ipamorelin triggers selective pituitary GH release via ghrelin receptor activation without affecting stress hormones.

THE CJC-1295/IPAMORELIN PROCESS AT mobivive

1. **Complete your medical questionnaire**

Fill in the questionnaire. If you answer **"No" to all questions**, your **CJC-1295/Ipamorelin order is placed**.

If you answer **"Yes" to any question**, a **once-off consultation (R500)** is required.

2. **Order and delivery**

Your CJC-1295/Ipamorelin arrives as a **prefilled cartridge pen**, no vials, no mixing.

3. **Weekday evening routine**

Self-administer once daily, Monday to Friday, ideally 30-60 minutes before

Company Name: Mobivive PTY LTD

Comp Registration: 2021/454217 / 07

VAT Number: 4340304361

Address: Shop 5A, 1st Floor, The Promenade, 87 Victoria Road, Camps Bay 8005

bedtime on an empty stomach: remove cap, dial your prescribed dose (100mcg of each peptide), clean injection site, and inject subcutaneously at a 45-90° angle into your lower abdomen, front of thigh, or upper arm. Rotate sites each evening.

KEY REMINDERS

- Inject once daily, Monday to Friday, 30-60 minutes before bedtime on an empty stomach; weekends off
- Rotate between abdomen, thighs, and upper arms each evening
- Consistent sleep schedule and training routine enhance results
- Store prefilled cartridge pen in refrigerator
- Most clients notice improved sleep within days; body composition changes emerge over 4-8 weeks
- **All mobivive peptides are prefilled cartridge pens, no vials, no needles**

HOW MUCH DOES IT COST

CJC-1295/Ipamorelin Combination Prefilled Cartridge Pen: R1,550

(20-dose supply (4 weeks, Monday to Friday) + medical questionnaire review; R500 consultation fee applies if questionnaire triggers doctor review)

THE CJC-1295/IPAMORELIN TRANSFORMATION PROGRAM

This comprehensive 12-week program pairs your weekday CJC-1295/Ipamorelin therapy with 12 weekly Wellness IV treatments to create maximum synergy for GH optimization, muscle growth, fat loss, recovery, and anti-aging.

LET'S TALK SIDE EFFECTS

The CJC-1295/Ipamorelin combination is generally well-tolerated with a favourable safety profile. Some clients may experience mild injection site redness that resolves quickly, transient facial flushing or warmth (usually within minutes of injection benign), temporary increased hunger 20-30 minutes post-injection (ghrelin effect normal and fades), or mild water retention in the first 1-2 weeks as tissues adapt.

BOOKING YOUR TREATMENT / ORDER YOUR PEPTIDE
