CJC-1295 (STANDALONE) INFORMATION DOCUMENT

WHAT IS CJC-1295, ANYWAY?

CJC-1295 (No-DAC, also known as Modified GRF 1-29) is a synthetic 29-amino-acid analogue of growth hormone-releasing hormone (GHRH), delivered in a convenient prefilled cartridge pen. It signals your pituitary gland to release your own growth hormone (GH) in natural, physiological pulses. Because the No-DAC form is short-acting, it is administered subcutaneously once daily, Monday to Friday (200mcg / 15 clicks), to mimic the body's natural GH rhythm, with weekends off to preserve pulsatility. Each cartridge provides 4mg total (20 doses) for four weeks of weekday therapy.

INTRODUCING CJC-1295 AT mobivive

Experience natural growth hormone optimization with CJC-1295 standalone your dedicated, single-peptide GHRH solution for recovery, body composition, anti-aging, and performance! mobivive pairs this therapy with targeted Wellness and Recovery IVs to maximize your regenerative potential.

THE SCIENCE

CJC-1295 binds to GHRH receptors in the pituitary gland, stimulating the release of growth hormone in pulses that mirror the body's natural rhythm. As a short-acting (No-DAC) GHRH analogue, it produces a clean pulse of GH shortly after each injection, which in turn raises IGF-1 from the liver the downstream mediator of tissue growth, fat metabolism, cellular repair, and collagen synthesis. Because it works through your own pituitary axis, it preserves the pulsatile nature of GH release and does not suppress natural GH production.

THE CJC-1295 PROCESS AT mobivive

1. **Complete your medical questionnaire**

Fill in the questionnaire. If you answer **"No" to all questions**, your **CJC-1295 order is placed**.

If you answer **"Yes" to any question**, a **once-off consultation (R500)** is required.

2. **Order and delivery**

Your CJC-1295 arrives as a **prefilled cartridge pen**, no vials, no mixing.

3. **Daily weekday routine**

Self-administer once daily, Monday to Friday: remove cap, dial your

prescribed dose (200mcg / 15 clicks), clean the injection site, and inject subcutaneously at a 45-90° angle into your lower abdomen, front of thigh, or upper arm. Rotate sites with each injection.

KEY REMINDERS

- Inject once daily, Monday to Friday (200mcg / 15 clicks); weekends off
- Rotate between abdomen, thighs, and upper arms with each injection
- Consistent sleep schedule and training routine enhance results
- Store prefilled cartridge pen in refrigerator
- Most clients notice improved sleep and recovery within the first 2 weeks; body composition changes emerge over 6-12 weeks
- **All mobivive peptides are prefilled cartridge pens, no vials, no needles**

HOW MUCH DOES IT COST

CJC-1295 Prefilled Cartridge Pen: R1,780

(20-dose supply + medical questionnaire review; R500 consultation fee applies if questionnaire triggers doctor review)

THE CJC-1295 TRANSFORMATION PROGRAM

This comprehensive 12-week program pairs your weekday CJC-1295 therapy with 12 weekly Wellness IV treatments to create maximum synergy for GH optimization, muscle growth, fat loss, recovery, and anti-aging.

LET'S TALK SIDE EFFECTS

CJC-1295 is generally well-tolerated with a favourable safety profile. Some clients may experience mild injection site redness that resolves quickly, transient facial flushing or warmth shortly after injection (benign), mild water retention in the first 1-2 weeks as tissues adapt, or temporary tingling or numbness at the injection site. These effects typically resolve as the body adjusts.

BOOKING YOUR TREATMENT / ORDER YOUR PEPTIDE

Ready to unlock natural growth hormone potential? Whether you need more info or are ready to **order your peptide**:
