SS-31 (ELAMIPRETIDE) INFORMATION DOCUMENT

WHAT IS SS-31, ANYWAY?

SS-31, also known as Elamipretide or Bendavia, is a novel mitochondria-targeting peptide (Szeto-Schiller peptide 31) composed of alternating aromatic and cationic amino acids that allow it to selectively concentrate in mitochondrial membranes, your cells' energy powerhouses. This groundbreaking peptide directly stabilizes cardiolipin, a critical phospholipid that maintains mitochondrial structure and optimizes energy production. Delivered via convenient prefilled cartridge pens in 5mg doses administered subcutaneously 2 times per week, each cartridge provides 40mg total (8 doses) for approximately 4 weeks of therapy.

INTRODUCING SS-31 AT mobivive

Experience breakthrough mitochondrial repair with SS-31, the advanced peptide that directly restores your cellular powerhouses for profound energy, performance, and longevity benefits! mobivive pairs SS-31 therapy with targeted Energy and Longevity IVs to create comprehensive mitochondrial optimization and help you reclaim your vitality.

THE SCIENCE

SS-31's unique mechanism targets the root cause of many age-related and chronic diseases: mitochondrial dysfunction. Its alternating positive and aromatic amino acid structure allows it to selectively accumulate in mitochondrial inner membranes where it binds and stabilizes cardiolipin—a phospholipid essential for optimal electron transport chain function and ATP production.

THE SS-31 PROCESS AT mobivive

1. **Complete your medical questionnaire**

Fill in the questionnaire. If you answer **"No" to all questions**, your **SS-31 order is placed**.

If you answer **"Yes" to any question**, a **once-off consultation (R500)** is required.

2. **Order and delivery**

Your SS-31 arrives as a **prefilled cartridge pen**, no vials, no mixing.

3. **Twice-weekly routine**

Self-administer typically 2 times per week: remove cap, dial your prescribed dose (5mg, typically 30 units), clean injection site, and inject subcutaneously

Contact Number: 061-509-6038

Email: info@mobivive.co.za

Web page: www.mobivive.co.za

Company Name: Mobivive PTY LTD

Comp Registration: 2021/454217 / 07

VAT Number: 4340304361

Address: Shop 5A, 1st Floor, The Promenade, 87 Victoria Road, Camps Bay 8005

at a 45-90° angle into your lower abdomen, front of thigh, or upper arm.
Rotate sites with each dose.

KEY REMINDERS

- Inject typically 2 times per week on consistent days (e.g., Monday/Thursday)
- Can be administered any time of day, with or without food
- Rotate between abdomen, thighs, and upper arms
- Benefits are cumulative consistent use over weeks allows mitochondrial repair
- Store prefilled cartridge pen in refrigerator
- Many clients notice improved energy within 1-2 weeks
- **All mobivive peptides are prefilled cartridge pens, no vials, no needles**

HOW MUCH DOES IT COST

SS-31 Prefilled Cartridge Pen: R3,699

(4-dose supply (2-4 weeks depending on protocol) + medical questionnaire review;
R500 consultation fee applies if questionnaire triggers doctor review)

THE SS-31 MITOCHONDRIAL RESTORATION PROGRAM

This comprehensive program pairs your SS-31 therapy with weekly Energy and Longevity IV treatments to create maximum mitochondrial synergy from multiple angles.

LET'S TALK SIDE EFFECTS

SS-31 is generally well-tolerated with a favourable safety profile in clinical studies. Some clients may experience mild injection site redness or tenderness that resolves quickly, transient increase in energy that may feel unusual initially (usually very positive), temporary mild digestive changes as cellular metabolism optimizes (rare), or mild headache in first 1-2 doses (adaptation, rare).

BOOKING YOUR TREATMENT / ORDER YOUR PEPTIDE

Ready to restore your cellular powerhouses? Whether you need more info or are ready to **order your peptide**:

1. Email: info@mobivive.co.za
2. Call or WhatsApp: **061-509-6038**
