THYMOSIN ALPHA-1 INFORMATION DOCUMENT

WHAT IS THYMOSIN ALPHA-1, ANYWAY?

Thymosin Alpha-1 (Ta1) is a powerful 28-amino-acid immunomodulatory peptide naturally produced by your thymus gland to mature and activate T-cells, the elite soldiers of your adaptive immune system. Originally isolated in the 1970s and approved in several countries as Zadaxin for hepatitis B/C and immunocompromised states, Thymosin Alpha-1 is now available for broader immune optimization through compounding. Delivered via convenient prefilled cartridge pens in 1.5mg doses administered subcutaneously twice a week (the doctor may increase this to three times a week), each cartridge provides 24mg total (15 doses at 1.5mg) for approximately 5-7 weeks of therapy depending on protocol.

INTRODUCING THYMOSIN ALPHA-1 AT mobivive

Supercharge your immune system at the cellular level with Thymosin Alpha-1—the scientifically-proven peptide for immune optimization, viral defense, and resilience! mobivive pairs Thymosin Alpha-1 therapy with targeted Super Immune IVs to create comprehensive immune support that helps you stay healthy, energized, and protected.

THE SCIENCE

Thymosin Alpha-1 works through multiple sophisticated immune mechanisms: it matures naive T-cells in the thymus and peripheral tissues for enhanced immune surveillance, upregulates natural killer (NK) cell activity for improved viral and cancer cell destruction, enhances dendritic cell function for better antigen presentation, and modulates cytokine production.

THE THYMOSIN ALPHA-1 PROCESS AT mobivive

1. Complete your medical questionnaire

Fill in the questionnaire. If you answer **"No" to all questions**, your **Thymosin Alpha-1 order is placed**.

If you answer **"Yes" to any question**, a **once-off consultation (R500)** is required.

2. Order and delivery

Your Thymosin Alpha-1 arrives as a **prefilled cartridge pen**—no vials, no mixing.

3. Twice-weekly routine

Self-administer twice a week (e.g., Monday/Thursday), or three times a week if the doctor prescribes it: remove cap, dial your prescribed dose (1.5mg,

Company Name: Mobivive PTY LTD

Comp Registration: 2021/454217 / 07

VAT Number: 4340304361

Address: Shop 5A, 1st Floor, The Promenade, 87 Victoria Road, Camps Bay 8005

typically 15 units), clean injection site, and inject subcutaneously at a 45-90° angle into your lower abdomen, front of thigh, or upper arm. Rotate sites with each dose.

KEY REMINDERS

- Inject twice a week on consistent days (three times a week only if prescribed)
- Can be administered any time of day, with or without food
- Rotate between abdomen, thighs, and upper arms with each injection
- Store prefilled cartridge pen in refrigerator
- Most clients notice improved resilience and fewer illnesses within 2-4 weeks
- **All mobivive peptides are prefilled cartridge pens, no vials, no needles**

HOW MUCH DOES IT COST

Thymosin Alpha-1 Prefilled Cartridge Pen: R2,999

(15-dose supply (5-8 weeks depending on protocol) + medical questionnaire review; R500 consultation fee applies if questionnaire triggers doctor review)

THE THYMOSIN ALPHA-1 IMMUNE OPTIMIZATION PROGRAM

This comprehensive program pairs your Thymosin Alpha-1 therapy with weekly Super Immune IV treatments (high-dose vitamin C, zinc, B-complex, glutathione, minerals) to create maximum immune synergy.

LET'S TALK SIDE EFFECTS

Thymosin Alpha-1 has an excellent safety profile established over 40+ years of clinical use. Most clients experience no adverse effects. Occasionally, mild injection site redness may occur and resolve quickly, transient fatigue or mild flu-like symptoms (typically in first 1-2 doses as immune system activates, usually positive sign), or temporary mild fever (rare, indicates immune activation).
