ARA-290 (CIBINETIDE) INFORMATION DOCUMENT

WHAT IS ARA-290, ANYWAY?

ARA-290 (cibinetide) is an 11-amino-acid peptide derived from erythropoietin (EPO), the body's own tissue-protection signal. Unlike EPO, it does not stimulate red blood cell production and does not thicken the blood. It activates the Innate Repair Receptor, which switches on the body's anti-inflammatory and tissue repair pathways after injury, low oxygen or metabolic stress. It is used for nerve pain, especially small fibre and diabetic neuropathy, nerve repair and better microcirculation. Each prefilled pen holds 60mg: one 2mg dose daily for a full 28-day course.

INTRODUCING ARA-290 AT mobivive

Calm the nerves at the source with ARA-290, the repair peptide studied for small fibre and diabetic neuropathy. One pen, one 28-day course, prescribed by our doctor and delivered to your door.

THE SCIENCE

ARA-290 binds the Innate Repair Receptor (the EPO receptor paired with the beta common receptor) that appears on stressed and injured tissue. Activating it reduces neuro-inflammation, protects cells from oxidative stress and prevents programmed cell death, while supporting nerve regeneration and healthy blood vessel function. Because it does not act on red blood cell production, it avoids the blood-thickening effect of EPO. Clinical studies in type 2 diabetes and sarcoidosis-associated neuropathy reported improved neuropathic symptoms and corneal nerve regeneration.

THE ARA-290 PROCESS AT mobivive

1. Complete your medical questionnaire

Fill in the questionnaire. If you answer **"No" to all questions**, your **ARA-290 order is placed**.

If you answer **"Yes" to any question**, a **once-off consultation (R500)** is required.

2. Order and delivery

Your ARA-290 arrives as a **prefilled cartridge pen**, no vials, no mixing.

3. Daily injection routine

Self-administer once daily for 28 days: remove cap, dial your prescribed dose (2mg), clean the injection site, and inject subcutaneously at a 45-90° angle

Contact Number: 061-509-6038

Web page: www.mobivive.co.za

Company Name: Mobivive PTY LTD

Comp Registration: 2021/454217 / 07

VAT Number: 4340304361

Address: Shop 5A, 1st Floor, The Promenade, 87 Victoria Road, Camps Bay 8005

into your lower abdomen (at least 5cm from the navel), front of thigh or upper arm. Rotate sites each time.

KEY REMINDERS

- Inject once daily at the same time for the full 28 days
- One pen covers the whole 28-day course
- Can be taken with or without food
- Store the prefilled pen in the fridge (2 to 8°C)
- Your doctor will advise whether a second course is needed
- **All mobivive peptides are prefilled cartridge pens, no vials, no needles**

HOW MUCH DOES IT COST

ARA-290 Prefilled Cartridge Pen: R3,980

(30-dose supply (one 28-day course) + medical questionnaire review; R500 consultation fee applies if questionnaire triggers doctor review)

LET'S TALK SIDE EFFECTS

ARA-290 was well tolerated in clinical studies. Mild redness or itching at the injection site may occur and usually settles within hours.

BOOKING YOUR TREATMENT / ORDER YOUR PEPTIDE

Ready to start your repair course? Whether you need more info or are ready to **order your peptide**:
